

## Collection recommendation table

For rooms with a lower floor load, all floor coverings are suitable for use in rooms with a higher load. So, any covering from the selection for the kitchen / corridor is perfect for an office or bedroom, and a sufficiently wear-resistant covering from the selection for "OFFICE" - in any of the premises of the "HOUSE"!

It is important to remember that recommendations for all public and industrial premises require additional correlation with the requirements for fire safety of specific premises (KM2 or others).
